Grade Sheet Lesson Teacher Tips

Lesson Description: The Grade Sheet Lesson is a resource that enables students to track their grade in a class. It is also a tool used to communicate student progress to the home. Finally, it provides content practice in fractions, decimals, and percents.

Math Content: Fractions, Decimals, and Percents

The Grade Sheet Lesson includes:

- * 2 Grade Sheet forms to track up to 30 grades in any grading period
- * 1 assignment sheet with 3 sets of fictitious grades that can be used to learn the Grade Sheet
- * 2 quizzes that can be administered to your class in order to assess understanding
- * 2 answer keys for the Grade Sheet assignments and the Grade Sheet quizzes
- * 1 Grade Sheet Teacher Tips sheet

Materials Needed: None

Suggested Grade Level: 5th - 12th

Teacher Tips:

- * The most common error made by students is not rounding decimals to the nearest hundredth.
- * You may need to alter the letter grade on the practice sheets or quizzes if your grading scale is different from the one used here.
- * The parent signature box is optional, but I require it as proof that parents know class grades.
- * I subtotal ten homework scores before students enter a homework score on their Grade Sheet. This keeps the amount of entries to a reasonable number while still providing the relevant information.
- * For the Grade Sheet to be most effective, make it a part of the culture of your class. Share it with parents at Back-to-School Night, allow class time to enter grades, check frequently for parent signatures, and collect at times. I collect mine at mid-quarter and at the end of the quarter and grade them, comparing them to my own computer gradebook.

Testimonial:

One of the first things I do each year with my students is teach them how to use my Grade Sheet. The students complete two or three practice Grade Sheets and then take a quiz to prove their ability to use this tool. For the remainder of the year, each time I give the students a grade they must enter it onto their Grade Sheet, calculate their new cumulative grade in my class, and then have their parent sign it. After a few assignments they will fill out their Grade Sheets with little prompting. I rarely hear parents say that they weren't aware of their child's grades!!

Most parents see and sign their child's Grade Sheet 10-15 times per quarter and are continually updated with their child's progress. The Grade Sheet also brings ownership of their grades to the students. As a math teacher I love to see the students learning the effect of each assignment on their cumulative grade. "I only need 5 more points for a B." or "This assignment really brought up my grade." are common types of comments I hear as students earnestly enter each grade to see its effect. In the past, students have often had trouble making the connection between their individual efforts and their final grade.
